

Smart Sensor Technology Saves Feed Costs

"Aanderaa's new Oxygen Optodes and Conductivity Sensors need no time-consuming recalibration or costly maintenance. Data can be viewed instantly and measures taken to correct detrimental living conditions immediately"

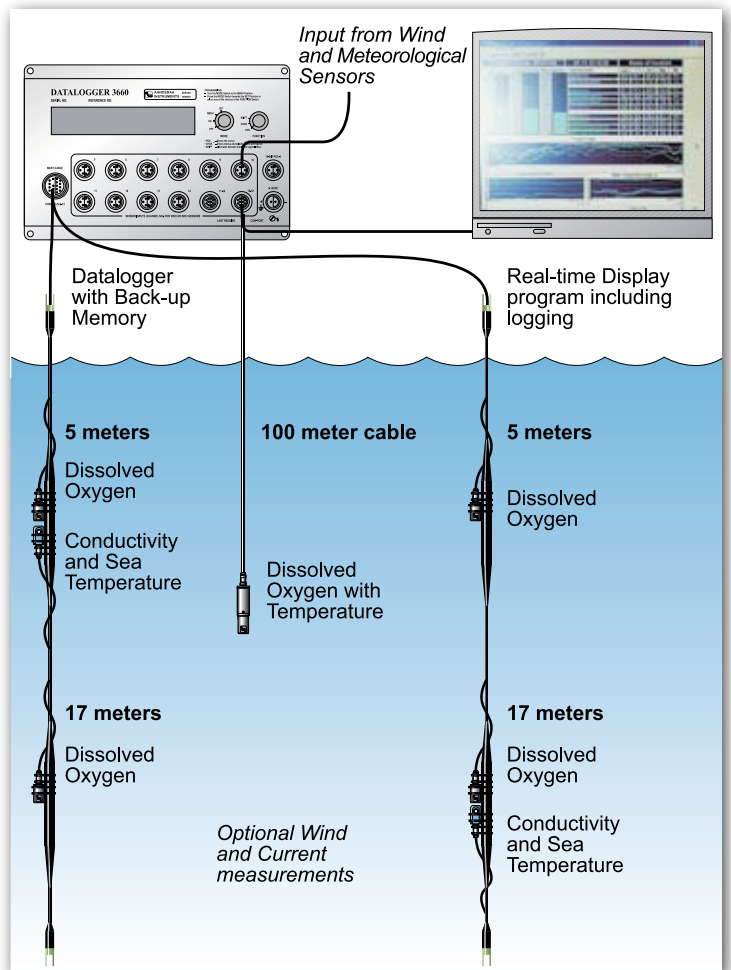

Real-time Display Program including Logging

"Feed costs have sunk since the introduction of Dissolved Oxygen, Conductivity and Temperature Sensors together with modern Display Programs" says Helge Hansen at Bognøy Fish Farm, Norway.

Oxygen/Conductivity System from Aanderaa:

- Calibration is Valid for at least 2 Years
- High Accuracy
- Patented Foil Technology
- Fast Response Time
- Not Stirring Sensitive
- Highly Resistant to Marine Fouling
- True Salinity Compensated Oxygen Data

Monitoring system is intuitive and easy to install
